

Water Infrastructure Business Development Mission to SINGAPORE, VIETNAM AND THE PHILIPPINES

Explore Dynamic Opportunities in the ASEAN Region

The United States Department of Commerce, International Trade Administration is organizing an Executive-led Water Infrastructure Business Development Mission to Singapore, Vietnam, and the Philippines. These countries are part of the 10 member states comprising the Association of Southeast Asian Nations (ASEAN) which represent a region that received over \$78 billion of merchandise exports from the United States in 2014.

- **Singapore** - Water demand is about 1.4 million cu meters daily but domestic resources only meet about 50% of demand.
- **Vietnam** - A top government priority is wastewater which is currently untreated and discharged directly to the environment.
- **Philippines** – A growing population of over 100 million with several large construction projects.
- **Asian Development Bank** – ADB has earmarked \$4 billion for water projects in ASEAN alone through 2017, which translates to sizable procurement opportunities for U.S. consultants, and goods and equipment suppliers.

Trade Mission Features:

- U.S. Department of Commerce Executive-led
- Introduce U.S. firms to rapidly expanding water infrastructure markets.
- Customized one-on-one meetings and networking events with government leaders, potential partners, distributors, and end users.
- Gain insights, make industry contacts, solidify business strategies and advance specific technologies.
- The Philippine stop will include a briefing on ADB business opportunities in the Asia Pacific Region. ADB lends over \$22 billion annually to its 48 emerging market member countries. Over \$2 billion went to the water sector in 2014.

Opportunities in All Areas of Water Infrastructure!

- Advanced Filtration
- Biological treatment technology
- Drainage pipes & systems
- Engineering and construction
- Headworks
- Membrane filtration
- Monitoring equipment
- Operations services
- Pipes, pumps, and valves
- Plumbing and system materials
- Water treatment technologies
- SCADA Systems
- Sewage treatment/management
- Testing & Laboratory Equipment
- Trenchless technology
- UV Disinfection Systems
- Water Treatment Chemicals
