

U.S. Exhibitors at K' 2016

ACCRAPLAY

Equipment

Product Description: Accraplay is a provider of label application equipment for a multitude of industries, as well as converting equipment for the flexible packaging and shrink sleeve label converting industries.

Location: Hall: 3, E06

ADDEX, INC.

Equipment

Product Description: High Tech Blown Film Extrusion Equipment, up to 9 layers, featuring automatic film thickness controls, internal bubble cooling, film flattening and non-contact winding.

Location: Hall 17, C37

AGR INTERNATIONAL INC.

Equipment

Product Description: AGR International, Inc. offers a broad line of products and services specifically designed for the quality assurance needs of the global beverage and packaging industries

Location: Hall 11, Booth: B40

AKRON USA - STATE OF OHIO

Location

Product Description: State of Ohio's trade and economic development organization; focusing on the Akron region.

Location: Hall 13, B 91-15

ALPS – AIR LOGIC POWER SYSTEMS, LLC

Testing

Product Description: ALPS designs and manufactures high performance leak testing equipment for the empty plastic container industry

Location: Hall 10, B65

AMETEK, WESTCHESTER PLASTICS

Materials

Product description: Westchester Plastics is a leading independent toll compounder of engineering resins, alloys, reactive modifiers, and a wide range of other thermoplastic polymers, development and processing services

Location: Hall 05, C04-2

APEX MACHINE COMPANY

Machinery

Product Description: Apex Machine Company is committed to developing tailor-made product printing solutions for today's markets. We manufacture customized product decoration machinery for any purpose providing high speed, cost effective, solutions without compromising quality.

Location: Hall 4,;E22

ARIZONA INSTRUMENT LLC

Testing

Product Description: Arizona Instrument manufactures precision moisture analysis instruments; toxic gas analyzers etc. Location: Hall:13, B91-13

ASCEND PERFORMANCE MATERIALS

Materials

Product Description: Ascend Performance Materials is a major producer of Nylon 6,6. It supplies nylon intermediate chemicals; resins; fibers; compounds and specialty chemicals.

Location: Hall:6, C52

AVALON VISION SOLUTIONS

Control

Product Description: The MoldWatcher inspection system ensures that all inserts are properly placed prior to permitting the table to index and the mold to close. The system will also detect miscellaneous items that may have been left on the lower mold half. After ejection, the system checks to ensure all parts have left the upper mold half. Harsh environment systems include sealed, forced air cooled cameras that allow the MoldWatcher system to be used in high temperature applications like die- casting & metal injection molding

Location: Hall:13, B91-2

AXEL PLASTICS RESEARCH LABORATORIES, INC.

Chemicals

Product Description: Axel manufactures a full range of proprietary mold releases and process aid additives.

Location: Hall 5, E01

B&P PROCESS EQUIPMENT & SYSTEMS

Equipment

Product Description: B&P provides Extruding and Mixing Equipment to a variety of industries. Our Ko-Kneaders and co-rotating Twin-Screw Extruders include over 40 years of development and innovation. We have a fully equipped lab for test trials. B&P offers experienced technology in Thermoplastics Compounding; Powder Coatings, Toners; Adhesives; Pharmaceuticals; Bulk and Specialty Chemicals.

Location: Hall 8b, E27

BAMBERGER POLYMERS, INC.

Materials

Product Description: Bamberger Polymers is a global distributor of plastic resins for molders, extruders, compounders and manufacturers serving nearly every major industry.

Location: Hall 5, C09-5

BIRLA CARBON CORP.

Materials

Product Description: American representation of the Turkish manufacturer BIRLA supplying viscose staple fibers; carbon black; insulators; acrylic fibers etc.

Location: Hall 8a, H38

BROWN MACHINE

Machinery

Product Description: Brown Machine offers a complete line of both continuous thermoforming machines (sometimes called in-line thermoforming machines) and cut sheet thermoforming equipment; from entry-level to the most technologically advanced thermoforming systems.

Location: Hall:3, C50

BURGER & BROWN ENGINEERING, INC.

Components

Burger & Brown Engineering designs and manufactures custom-tailored precision components, from motorcycle part manufacturing to automatic feeding stations for small animals.

Product Description: Location: Hall 13, B91-12

CABOT CORPORATION

Materials

Product Description: Cabot manufactures specialty chemicals such as rubber and specialty carbons, cesium formate brines, activated carbon, aerogel, fine cesium chemicals, fumed metal oxides, graphenes, inkjet colorants, masterbatches and conductive compounds.

Location: Hall:6, E62

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.

Materials

Product Description: Calumet specializes in hydrocarbon products. Product lines include both naphthenic and paraffinic oils, aliphatic solvents, synthetic lubricants, asphalt, fuels, white mineral oils, waxes, petrolatums and hydrocarbon gels.

Location: Hall 8b, H29

CARTER DAY INTERNATIONAL, INC.

Equipment

Product Description: Among other equipment, Carter manufactures a processing system line of stainless steel dewatering, drying, and cleaning equipment for the Plastics industry

Location: Hall 13, B91-11

CTR FOR BIOPLASTIC/ BIOCOMPOSITES

Research

IOWA STATE UNIVERSITY

Product Description: The Center links university researchers and industry members. It focuses on developing biobased products from agricultural feedstocks.

Location: Hall 5, C07-1

CHROMA CORPORATION

Filters

Product Description: Chroma Technology is well known for creating filter sets for the multitude of fluorochromes that are typically used in epi-fluorescence microscopy. Search our catalog to find a filter set that matches your application.

Location: Hall 8a, H 31

CLOEREN INCORPORATED

Equipment

Product Description: Carrier is internationally known for its pioneering work in the field of vibratory technology. For over 60 years, we have developed processing equipment to meet the needs of a broad range of industries including chemicals, synthetics, foundry, glass, food, explosives, wood, coal, metals, pharmaceuticals, scrap and recycling

Location: Hall 2, Booth: G24

CMD CORPORATION

Machinery

Product Description: Until recently, automated packaging for trash bag production was only a concept. Today, our automation integration team helped one converter save our \$ 600.000 in annual labor costs. We don't just build converting machines. We convert concepts into profits.

Location: Hall 3, G05

COMMODORE TECHNOLOGY LLC

Equipment

Product Description: Commodore Technology designs and manufactures equipment for the production of expanded polystyrene foam trays. We make extruders, thermoformers, tooling and auxiliary equipment at our facility in Bloomfield, New York. We specialize in turnkey facility design and installation.

Location: Hall 13, B91-1

CONAIR GROUP

Equipment

Product Description: CONAIR manufacturers simplified low cost resin loaders.

Location: Hall: 10, J59

CONSULTEX SYSTEMS

Machinery

Product Description: CONSULTEX manufactures an innovative line of textile machinery for the finishing of knit and woven fabrics.

Location: Hall 11, B29

CONTINENTAL INDUSTRIES GROUP, INC.

Materials

Product Description: Continental Industries Group, Inc. engages in the distribution of chemicals and polymers. It offers polyethylene, polypropylene, copolymers, polyvinyl chloride, polystyrene, polyethylene terephthalate, engineering plastics, and masterbatch, as well as specialty and commodity chemicals.

Location: Hall 5, C07-05

CUSTOM POLYMERS, INC.

Materials

Product Description: Custom Polymers buys, processes, and sells both commodity and engineering grade plastics in all forms. We are a leading recycler and reprocessor of post-industrial and post-consumer plastic, headquartered in Charlotte, N.C., operating multiple worldwide locations.

Location: Hall 5, Booth: D09-8

D.R. JOSEPH, INC

Control

Product Description: Dr. Joseph provides the blown film industry with the latest in high "value added" technologies, such as internal bubble cooling control systems and technologies. Location: Hall 13, B91-32

DAVIS-STANDARD CORPORATION

Machinery

Product Description: Davis-Standard, LLC is proud to introduce the Extrusion Systems Group, the industry's premier source for compounding, fiber, foam, pipe, profile & tubing, reclaim, sheet, laboratory & specialty, elastomer, and wire & cable solutions

Location: Hall 16, Booth: A43

DYNA-PURGE DIVISION OF SHUMAN PLASTICS

Purging

Product Description: Dyna-Purge is a 100% thermoplastic purging compounds, that is used to clean plastic processing equipment of old color, resin and carbon build-up when changing to a different resin or color. Using Dyna-Purge saves valuable resin, time and produces less scrap when making a change. \nDyna-Purge helps you become more productive.

Location: Hall 13, B91-34

EMERALD PERFORMANCE MATERIALS

Materials

Product Description: Emerald manufactures advanced specialty chemicals for a broad range of food and industrial applications.

Location: Hall:5, C05-1

ENERCON INDUSTRIES CORPORATION

Equipment

Product Description: Enercon is the world's leading manufacture of surface treating systems and associated support equipment. Companies in the printing, coating, laminating and extruding industries rely on Enercon to provide surface treating solutions that functionalize the surfaces of a variety of materials.

Location: Hall 11, A68

EVANS ANALYTICAL GROUP (FORMERLY CHEMIR) Research

Product Description: EAG Laboratories offers contract research and testing services etc. EAG can assist to accelerate research and development, solve manufacturing problems or ensure compliance with industry and governmental regulations.

Location: Hall 7.1/A 55

EXTREME COATINGS, SURFACE ENGINEERING

Coatings

Product Description: Extreme Coatings offers carbide encapsulated feed screws. Surface Engineering's Extreme Coatings™ process utilizes emerging thermal spray technologies to apply extremely wear resistant and/or corrosion resistant protective coatings to virtually any size injection molding or extrusion feed screw.

Location: Hall 13, Booth: B91-6

EXTRUSION TECHNIK USA

Machinery

Product Description: Extrusion Technik is designing and manufacturing plastic extrusion machinery.

Location: Hall12, C32

FARREL CORPORATION

Equipment

Product Description: U.S. representation of Italian producer of compounding systems.

Location: Hall 9 A24

FORMOSA PLASTICS CORPORATION, U.S.A.

Materials

Product Description: U.S. affiliate of Taiwanese producer, a vertically-integrated supplier of plastic resins and petrochemicals.

Location: Hall 7.0/B12

FRX POLYMERS

Materials

Product Description: FRX' polymers are fully transparent, high flowing & due to their high phosphorus content, are inherently flame retardant. FRX Polymers is commercializing Homopolymers, Copolymers and Reactive Oligomers for intended use as Polymeric Flame Retarding Additives, Inherently Flame Retardant Transparent Specialty Plastics & as Reactive FR Additives for Thermosetting Resin Systems.

Location: Hall 5, C06-1

GRAHAM ENGINEERING CORPORATION

Equipment

Product Description: GEC offers package design, development & plastic processing expertise along with monolayer, multilayer & barrier extrusion blow molding equipment & technology upgrades.

Location: Hall 16, A 73

HANSER PUBLICATIONS, LLC

Publication

Product Description: Trade Publication.

Location: Hall n/a, Booth:EN/02

HIGH-TECHNOLOGY CORPORATION

Equipment

Product Description: Continuous, fully automatic screen changers for polymer melt filtration.

Location: Hall 13B91-3

HUBER ENGINEERED MATERIALS

Materials

Product Description: Huber provides specialty precipitated silicas and silicates, alumina trihydrate, magnesium hydroxide, engineered molybdate compounds, processed nutritional ingredients, barium sulfate and industrial, food grade and USP calcium carbonate.

Location: Hall 6, D61

HIS Chemical

Insights

Product Description: Analysis and research of markets as well as critical data generation.

Location: Hall 5, E30

IRWIN RESEARCH & DEVELOPMENT, INC.

Parts

Product Description: Irwin Research provides quality parts on demand for the machines and tools in production, including emergency replacement parts.

Location: Hall 3, B30

JESC CO INC.

Parts

Product Description: JESC CO Inc. offers plastic components for the automotive industry.

Location: Hall 8b, A25

JOMAR CORPORATION

Equipment

Product Description: When it comes to blow moulding, Jomar offers plastics processing equipment that has set the standard for more than 30 years. Whether you're working with HDPE, PP, SAN or PET... making toiletries bottles or pharmaceutical containers or any type of packaging... we make a dependable blow moulding machine that suits your needs.

Location: Hall:14, Booth: A32

KASE EQUIPMENT CORPORATION

Equipment

Product Description:

Kase Equipment is dedicated to meeting your plastic container printing needs. We design equipment that will produce a high quality, attractive package with machines that are fast, versatile and efficient. We design and build the world's most complete line of dry offset printers for plastic cups, pails, tubes, lids and closures.

Location: Hall 4, B56

KNEADER MACHINERY USA LTD.

Machinery

Product Description: Kneader is a designer and manufacturer of rubber and plastic process machinery, including mixers and extruders.

Location: Hall 16, F78

KRATON POLYMERS

Materials

Product Description: Kraton is a producer of styrenic block copolymers, specialty polymers and high-value performance products derived from pine wood pulping co-products.

Location: Hall 5, C22

KUNDIG INTERNATIONAL, INC.

Measurement

Product Description: U.S. affiliate of Swiss gauge manufacturer for film extrusion.

Location: Hall:13, B91-32

MATHELIN BAY ASSOCIATES LLC

CONSULTING

Product Description: Mathelin Bay provides supply chain consulting and strategic sourcing exclusively for the plastics industry.

Location: Hall 5, C09-1

MAXI-BLAST, INC.

Materials

Product Description: Maxi-Blast is a plastic media producer, specialized in the manufacturing & distribution of non-abrasive plastic blast media. It has provided an alternative to chemical cleaning and sandblasting-type abrasives for over 25 years.

Location: Hall 13, Booth: B91-21

MCELROY FUSION

Equipment

Product Description: McElroy Polyethylene Fusion Equipment

McElroy is an independent manufacturing and engineering firm with dedication to excellence at the heart of everything we do. With a complete range of fusion equipment including PitBulls, TracStars and our original wheeled units, we have a polyethylene pipe fusion machine for every application.

Location: Hall 11, H 74

MGS MANUFACTURING GROUP

Equipment

Product Description: MGS develops tooling, molding and equipment systems for a great variety of applications, part geometries and resins.

Location: Hall 1, E36

MHG

Materials

Product Description: MHG manufactures biopolymer resins; e.g., PLA (polylactic acid) based biopolymer alloys, resins for injection molding, and UV resistant, 100% biodegradable, FDA approved PHA (polyhydroxyalkanoate), called Nodax.

Location: Hall 7.1/B40

MODERN DISPERSIONS INC.

Materials

Product Description: Modern Dispersions is a thermoplastics compounder and concentrate maker.

Location: Hall 5, C09-4

MONTACHEM INTERNATIONAL

Materials

Product Description: Montachem distributes a complete line of thermoplastic resins and related additives to meet the needs of plastics' converters worldwide, including PET; Polypropylene; PVC; Polyethylene; Polystyrene; engineering resins and masterbatches.

Location: Hall 7a/D01

MSM POLY, LLC

Materials

Product Description: MSM Poly is manufacturing the alternative material to Barex.

Location: Hall 6, A 23

MTS SYSTEMS CORPORATION

Testing

Product Description: MTS Systems is the leading provider of mechanical test systems for material testing, fatigue testing and tensile testing as well as motion simulation systems and calibration services.

Location: Hall 10, D51

NEUTREX, INC.

Purging

Product Description: Neutrex is a well-established producer of purging compounds, including the new Purgex 460 Plus commercial purging compound (CPC) for cleaning film lines. According to the company, the new CPC is a strong blend that is effective for purging heavily contaminated lines, particularly those infrequently purged. It can also be used to purge sheet molding lines.

Location: Hall 8b, H74,

NORDSON EXTRUSION DIES INDUSTRIES LLC.

Dies

Product Description: Nordson Extrusion Dies Industries designs and builds flat extrusion dies, co-extrusion feed blocks, and slot die coating heads for plastic processors and web converters across all industries.

Location: Hall 2, G06

NYACOL NANO TECHNOLOGIES, INC.

Materials

Product Description: Nyacol manufactures inorganic fine particle materials. It has specialized in the development and manufacture of sub-200-nanometer (nm) metal oxide materials as water-based colloidal sols, hydrocarbon-based colloidal dispersions, fine-particle powders, polymer concentrates and dispersions..

Location: Hall 8b, H29

OLYMPUS SCIENTIFIC SOLUTIONS AMERICAS INC.

Testing

Product Description: Olympus manufactures a portfolio of innovative test, measurement, and imaging instruments.

Location: Hall10, G25

ORIENT CORPORATION OF AMERICA

Materials

Product Description: Orient claims it to be the world's most technologically advanced manufacturing facility for the production of Nigrosine Dye.

Location: Hall 5, C06-2

ORYCON HOT RUNNER SYSTEMS

Machinery

Product Description: ORYCON is an OEM that has specialized exclusively in Hot Runner Systems.

Location: Hall13, B91-30

PARKINSON TECHNOLOGIES INC.

Equipment

Product Description: Evolving from a leading textile machinery designer to an industry leader in the manufacturing of winding and web handling equipment for the nonwovens, plastics and paper industries, Parkinson continues to take innovative approaches backed by demonstrated success and engineering excellence.

Location: Hall 3, D54

PELLETRON CORPORATION

Handling

Product Description: We provide Bulk Material Handling solutions and equipment to manufacturers and processors in various industries, including Plastics, Automotive, Chemical, Electronics, Pharmaceutical, Mineral and Food. Our core business lays in pneumatic conveying systems and components, with special know-how in the prevention and reduction of fines, streamers and other contaminants. The Pelletron DeDuster®, known for its outstanding fine removal efficiency, became a household word in the industry. Quality improvement of our customers' end products is our goal.

Location: Hall 11, G57

PHOSEON TECHNOLOGY

Curing

Product Description: Since 2002, Phoseon has pioneered the use of LEDs for UV curing applications with a 100% focus on UV LED curing technology.

Location: Hall 7.2/E10

PLASKOLITE INC.**Coating**

Product Description: Plaskolite offers an extensive range of high-quality thermoplastic sheet, acrylic polymers and hard coating services

Location: Hall 5, C05-5

PLASTICS NEWS/ EUROPEAN PLASTICS NEWS**Publication**

Product Description: Trade publication.

Location: Hall 6, C 08

PLASTICS TECHNOLOGY/GARDNER**Publication**

Product Description: Trade publication.

Location: Hall 13, B91-29

PLASTRAC, INC.**Equipment**

Product Description: Plastrac manufactures material blenders and loading systems.

Location: Hall 13, B91-33

POLLUTION CONTROL PRODUCTS CO.**Machinery**

Product Description: PCP manufactures burn off ovens. Its patented Controlled Pyrolysis® process cleans parts by using heat to decompose organic material into vapors and pyrolysis gases.

Location: Hall 13, B 91-16

POLYMER TECHNOLOGIES & SERVICES LLC**Materials**

Product Description: PTS is a manufacturer of high quality, UL listed thermoplastics, and a supplier of name brand and generic engineering resins.

Location: Hall 8b, D27

POLYONE CORP./GLS THERMOPLASTIC**Materials**

Product Description: Polyone provides specialty polymer formulations, color and additive systems, plastic sheet and packaging solutions and polymer distribution for a wide field of industries.

Location: Hall 8a, J15

PRECO, INC.**Equipment**

Product Description: Preco is a designer and manufacturer of high-speed and high-accuracy automated processing systems

Location: Hall 11, H26

PSI-POLYMER SYSTEMS INC.**Equipment**

Product Description: PSI is a supplier of screen changers, extrusion gear pumps and static mixers as stand alone components or complete engineered systems.

Location: Hall 9, E 41

PTI - PROCESSING TECHNOLOGIES INTERN.

Machinery

Product Description: PTi is a Global Leader in high performance sheet extrusion machinery. Engineered to exact standards PTi systems offer a unique array of design features resulting in superior equipment performance. PTi provides its customers with sheet extrusion systems that manufacture sheet goods to the highest quality standards found anywhere throughout the industry

Location: Hall 13, Booth: B91-10.

REX MATERIALS, INC.

Materials

Product Description: Rex Materials offer PYROLITE® vacuum formed ceramic fibers, FUSIO2N (Fusion) fused silica, Pyroform HP™ insulating refractory, and RX-TCON® ceramic/ceramic-metal matrix composite.

Location: Hall 13, Booth: B91-5

RJG TECHNOLOGIES, INC.

Control

Product Description: RJG offers: Closed loop control equipment for pressure; Measuring equipment for melt pressure; measuring equipment for melt temperature; computer software services etc.

Location: Hall 13, D90

SOCIETY OF PLASTICS ENGINEERS

Association

Product Description: SPE is the professional “home” for nearly 20,000 plastics professionals.

Location: Hall 11, E 21

SOCIETY OF THE PLASTICS INDUSTRY, INC. (SPI)

Association

Product Description: SPI is the U.S. Plastics Industry Trade Association. It represents the third largest manufacturing industry in the United States. SPI's member companies comprise the entire plastics industry supply chain, including processors, machinery and equipment manufacturers and raw materials suppliers.

Location: Hall 13, Booth: B91-28

STONER, INC.

Cleaners

Product Description: Stoner manufactures specialized cleaners, lubricants, and coatings for both business-to-business and consumer applications.

Location: Hall 5, C07-8

STRUKTOL COMPANY

Additives

Product Description: Struktol manufactures rubber and plastic additives.

Location: Hall 6, A23

SYNASIA INC.

Chemicals

Product Description: Synasia synthesizes cycloaliphatic epoxy resins, photoinitiators, polyurethane additives, pharmaceutical intermediates and other specialty chemicals. It also provides toll manufacturing services.

Location: Hall 7.2/D21

TASI TEST & INSPECTION

Instrumentation

Product Description: Tasi supplies product testing, inspection and quality solutions for a wide range of manufacturing. Among others, It focuses on instrumentation, test machines, and engineered systems for advanced packaging test inspection and leak detection.

Location: Hall 10, B65

TECHMER PM

Compounds

Product Description: Techmer offers masterbatch and engineered compounds for the plastics and fiber industries.

Location: Hall 7a/D 32

TESTING MACHINES INC.

Instrumentation

Product Description: The Testing Machines group of companies manufacture and market physical property testing instruments focused on the packaging, paper, pulp, plastic film, foil, ink, coatings, nonwovens, adhesives, and corrugated industries.

Location: Hall 10, B68

TEXTILES COATED INTERNATIONAL-TCI

Materials

Product Description: TCI is a manufacturer of high-performance fluoropolymer films, laminates, and composites.

Location: Hall 5, C07-4

THE CHEMICAL COMPANY

Chemicals

Product Description: The Chemical Company is a chemical distribution and chemical supplier with procurement offices in Europe, Latin America, and Southeast Asia. It stocks its wide range of products in warehouses throughout the world.

Location: Hall 5, C08-1

THE SHEPHERD COLOR COMPANY

Pigments

Product Description: The Shepherd Color Company is a producer of Complex Inorganic Color Pigments (CICPs) with high weatherability, heat and chemical resistance, non-warping and easy to disperse. It serves major markets, such as building & construction, automotive and aerospace through customers in the coatings, plastics, glass and ceramics segments.

Location: Hall 5, C05-4

THERMETIC PRODUCTS INC

Equipment

Product Description: Thermetic Products focuses primarily on the precision heating requirements for the runnerless molding industry. This allows us to meet the needs of the industry while creating top quality, great service and short leadtimes

Location: Hall 13, B91-22

THERMOFORMING SYSTEMS

Equipment

Product Description: Thermoforming Systems provides thermoforming equipment - Providing our customers with products of unsurpassed quality and supporting those products with unequalled service are goals that are of paramount importance. In doing so, we expect to make contributions to the state of the art of the thermoforming industry.

Location: Hall 3, D52

TRICON ENERGY

Materials

Product Description: TRICON is a distribution of a wide range of commodities.

Location: Hall 8a, H42

TROY CORPORATION

Chemicals

Product Description: Troy Corporation develops formulations to prevent of microbial degradation in products and processes as well as specialty materials to improve performance of the customer's products and their manufacturing.

Location: Hall 5, C04-1

UNITED SOFT PLASTICS, INC.

Materials

Product Description: United Soft Plastics is an innovative manufacturing company dedicated to the development of better SEBS (TPE's) compound solutions for its customers.

Location: HALL 5, C-09-3

UNIVERSAL DYNAMICS CORPORATION

Equipment

Product Description: Universal offers an extensive product range for material handling, drying, conveying, feeding, blending, size reduction and heat exchangers.

Location: Hall 9, C 59

UWAY EXTRUSION

Machinery

Product Description: Uway Extrusion engineers and builds custom extrusion systems with outputs of up to 14,000 lbs/hr.

Location: Hall16, A55

VEM TOOLING

Molds/Parts

Product Description: U.S. affiliate of Hongkong based VEM. It provides high precision molds and plastic parts.

Location: Hall 1, E02

VERTELLUS SPECIALTIES INC.

Chemicals

Product Description: Vertellus is fully integrated across the pyridine chemistry value chain – a major global manufacturer of pyridine and picolines.

Location: Hall 5, C08-2

ZEIGER INDUSTRIES

Screw tips

Product Description: Zeiger offers sophisticated screw tips. Screw Tip has a lifetime wear-through warranty on all solid carbide wear surfaces.

Location: Hall 11, C58

If you are interested in connecting with the companies listed, please let us know. We will be glad to assist: You can also reach us on the show floor at: Hall 5C09-2.
