

Showcase Advanced Energy Storage Technologies and Micro-Grid Solutions

Energy Storage India 2017

Demand for Energy Storage is Trending Upward:

- By the year 2022, Prime Minister Modi expects to increase India's installed capacity to 100 GW for solar power and 60 GW for wind power.
- The Ministry of New and Renewable Energy is developing a National Energy Storage Policy to fast-track adoption of new technologies in India, and will soon announce projects for demonstration of micro-grid and large-scale renewable energy integration solutions.
- India's grid challenges will require a variety of solutions, to incorporate a range of energy types and capacity levels. Opportunities exist for different grid-scale storage applications, as well as national deployment levels.

Why exhibit at Energy Storage India (ESI) 2017?

- As India's leading conference on energy storage and micro-grid solutions, over 50 exhibitors and 1,000 attendees from at least 25 countries are expected to attend.
- Network and demonstrate your technology to potential business partners in one of the world's most dynamic markets in the sphere of energy integration infrastructure.

U.S. Commercial Service Supports U.S. Exhibitors:

The U.S. Commercial Service offers support to any U.S. company participating in Energy Storage India 2017. In addition to hosting the U.S. Pavilion, our on-site team can facilitate networking, market counseling, and translation assistance. Pre-scheduled B2B matchmaking is also available, for a fee. For further information, contact us today!

Connecting you to global markets.

Join the U.S. Pavilion at Energy Storage India Expo 2017!

Date: January 12-13, 2017

Venue: Nehru Center
Mumbai, India

Deadline: November 30, 2016

Cost:

Built-out (Min. 6 sqm)

\$300 per sqm

Bare Space (Min. 12 sqm)

\$250 per sqm
