Overview

Teacher Created Materials (TCM) is one of the most recognized names in educational publishing. For over 35 years, its wide array of award-winning resources has been used by educators throughout the United States and internationally in 99 countries.

Products and Services

Offering a broad range of innovative Pre-K–12 curriculum resources, TCM's products support reading, writing, mathematics, social studies, science, technology, and professional development. TCM's resources and professional development training reflect the latest research, best classroom practices, and achievement-oriented methodologies. The practical and teacher-friendly solutions are developed to help teachers do what they do best – reach, teach, and inspire students everywhere.

History

In 1977, TCM was founded by Rachele Cracchiolo and her fellow classroom teacher—both looking to share their ideas and passion with their colleagues. The seeds they planted have blossomed into a vibrant and dynamic publishing company. Privately held and family owned since its inception, TCM is still run *by teachers for teachers*. In 2004, Shell Education was launched with the introduction of professional resources and classroom application books designed to support TCM's curriculum products and sold through a variety of channels.

Growth

From the very first publication, *Quick Fun Art*, Teacher Created Materials has grown with ever-expanding titles to over 1,700 products, eventually moving its headquarters to Huntington Beach, California, in 2004 to accommodate its growing staff, additional production, and larger warehouse facilities.

Partnerships

TIME FOR KIDS® - In 2000, TCM struck a landmark partnership with the award-winning TIME FOR KIDS® magazine, incorporating authentic content and graphics into many language arts programs with products that include *Exploring Writing*, the 2007 Teacher's Choice Award winner.

Texas Instruments - Collaborating with the Education Technology division of Texas Instruments yielded such products as *TechTools TI Graphing Calculators* to enrich math and science classroom learning experiences.

Microsoft® - The development of technology products have been carefully aligned to Microsoft® software, including PowerPoint®, Word®, and Excel®.

Sally Ride Science™ - Developed in partnership, TCM's *Science Readers* were reviewed for diversity and equity by Sally Ride Science™, who also contributed profiles of women scientists.

Google - TCM is proud to announce the development of upcoming educational resources for use with Google.
