

Accounting Firms

Accountants can be important resources in helping you determine how best to structure your business for export sales. The U.S. government has established several programs that can provide tax incentives to exporters. These generally involve the establishment of Foreign Sales Corporations. There are also tax and accounting questions that arise in some instances in the treatment of income from foreign sales and in treatment of foreign employees or foreign subsidiaries or offices. Many of the large accounting firms have information available covering these various topics. Likewise, most firms have offices in foreign countries allowing them extensive knowledge of foreign tax and business law and can provide expert help and assistance in the foreign countries themselves. These firms can often provide help in understanding the markets and business climate in the various countries and can provide many helpful contacts.
